After-Dinner Tricks

No. 119-Knocking Coin Through Hand

A coin is apparently driven through the back of the hand. Spin a coin in the air with the right hand several times, each time catching it in the right hand. Finally, as you spin the coin straight upward, hold the left hand, loosely open, just below the right. As the coin comes down let it go past the right, into the left, immediately closing the right hand as though it held the coin. Close the left hand and hold it back upward. Slap the right hand on the back of the left. When you lift the right hand the coin. which every one thought was in the right hand, has gone. Open the left hand showing how you drove the com right through the back of the hand.

## **Our Honored Citizens**

Who are the people in our communities we respect and honor most?

Aren't they the people who believe in God and who do their utmost to practice His teachings? Do you know of any prominent men or women any-

where in the world who are not believers in and followers of His word? Do you know any real man or woman in your circle of friends and acquaintances who isn't anchored to the

principles taught by the Bible and the Church? Is it too much to ask any of us that we attend church as regularly as we set apart hours of work and thought every day and week to achieve something worth while

in our careers? The churches of today teach the brotherhood of man, verence for God, and respect for all good things that the our thoughts and help us build character.
